PRICE FIVE CENTS

LINDSAY TO BEGIN PROBE IMMEDIATELY

Former Judge and Attorney-
general Sworn in as Special
Assistant to Handle Case

FEDERAL GRAND JURY
AND COURT THE SCENE

Mr. McCann Says He Has No
Objection Whatever to Man
Who Will Investigate

Alexander Lindsay, Jr., who was named Saturday afternoon to investigate the McCann-McBride affair.

Before Judge Charles F. Clemons in the federal court room this morning, Alexander Lindsay, Jr., former circuit judge and attorney-general for the territory, took the oath as special assistant to the attorney-general of the United States, with power to make a thorough and complete investigation of the McCann-McBride case.

Mr. Lindsay was informed by cable from Washington of his selection in this capacity, and the administration of the oath this morning clears the way for him to begin his new duties.

"I intend to take the investigation up at once," said Mr. Lindsay. "All matters pertaining to it which will necessitate court proceedings will come up in the federal court and before the federal grand jury. Prior to my appointment as special assistant, Washington was informed of my connection with the McCann-Sylvester case, but that apparently had no bearing on the attorney-general's selection."

"He is not a friend of mine, but I have no objection to his having been appointed; none in the world."

Judge Sanford B. Dole pointed out that the appointment of Mr. Lindsay to investigate the McCann-McBride case is a direct outgrowth of the correspondence in regard to the matter which has been exchanged between Honolulu and Washington, D. C.

"This correspondence would not interest the public," he added.

A meeting of the federal grand jury has been called for 10 o'clock next Monday morning in the federal court building. It is thought that this may be in connection with the investigation.

A. M. Brown, deputy city and county attorney, said this afternoon that the investigation into the charges against Jeff McCann has not been abandoned by the territorial grand jury, and as far as he knows will be continued regularly.

FALSE ALARM GIVEN.

A false alarm, turned in shortly before noon today, caused the engines at the central fire station to make a hasty run to the intersection of King and Keolu streets, where a frame building, formerly used as a macaroni manufactory, was reported to be on fire. An unsuccessful search was made for the person who made the report.

LIVELY LUNCHEON PROMISED.

The Ad Club luncheon at the Young Hotel tomorrow noon will be of unusual importance from the fact that, following a Kamahameha Day rally by the members, George R. Carter, president of the Chamber of Commerce of Honolulu, will outline the work which the chamber proposes to do during the coming twelve months. Many of the members of the Ad Club are also members of the new chamber, and it is hoped that there will be a large attendance at the gathering tomorrow.

FOR LEASE

3 lots on Beretania Street.
3 lots on Miller Street.
Suitable for stores or doctors' offices.

FORMER TERRITORIAL OFFICIAL WILL PROBE

Alexander Lindsay, Jr., who was named Saturday afternoon to investigate the McCann-McBride affair.

Appointments Held Up Till Probe is Over

According to a communication received by the Star-Bulletin this afternoon from Washington, all judicial appointments and the U. S. marshalship are to be held up until the McCann-McBride case has been settled. This is the attitude of the department of justice.

CHINA'S EXHIBIT AT 'FRISCO FAIR WILL BE UNIQUE

Three Commissioners and Party
of Skilled Artisans Here on
Way to San Francisco

As the pick of many hundred artisans, mechanics and experts in the construction of buildings according to Celestial custom and design, a party of 30 Chinese are passengers in the Toyō Kisen Kaisha liner Chiyō Maru, bound for San Francisco, where, upon arrival, they will be sent to the Panama-Pacific exposition grounds to immediately take up the work of assembling material and engage in the erection of a large and uniquely planned building that will serve the Chinese republic for headquarters.

Accompanying the delegation of skilled mechanics are several commissioners who joined the vessel at Hongkong and Shanghai. Shu Yuet Lu, N. L. Ting and Hwang Muta are representing the government and they are armed with the proper credentials and authorization to insure a speedy completion of the building.

Designed along the lines of a beautiful and spacious pagoda, much of the material that will enter into the structure is included as a part of the cargo that caused the big Chiyō Maru to lie well down in the water upon arrival at Honolulu this morning.

All the labor necessary to insure the completion of the building will be performed by Chinese, stated the commissioners this morning. The Tenyo Maru, which is to follow the Chiyō across the Pacific, will bring between 40 and 50 additional experts. Arrangements have been completed whereby the Chinese will be passed by the federal immigration authorities.

The structure was built at Shanghai and then taken down, each piece of material being lettered and then shipped to the United States.

The Chiyō Maru did not call at Manila, though this vessel secured a number of Philippine passengers, who transhipped from the steamer China at Hongkong. The homeward voyage is said to have been exceedingly pleasant. The Chiyō was favored with smooth seas. Berthing at Pier 6 this morning, the steamer was discharged of about 100 tons of cargo.

Leaving the vessel were 19 cabin, seven second class and 60 Asiatic steamer passengers. The Chiyō Maru is scheduled to sail for San Francisco at 10 o'clock tomorrow morning, the through list of passengers including 103 cabin, 50 second class and 189 Asiatic steamer.

Samuel Robley, extension work secretary of the boys' department of the Young Men's Christian Association, while making a dive during an athletic exhibition at Mills school Saturday evening displaced one of the vertebrae of his neck when he failed to land in the correct position on the mat. Despite his injury, which was painful although not serious, Mr. Robley continued his work of directing the exhibition.

BOARD CAUCUS SETTLES WATER- SEWER TRANSFER

Final Details to Be Concluded
By Supervisors Tonight,
They Expect

PLANS NOW FOR ENGINEER
TO BE SUPERINTENDENT

Economy Policy Calls for Com-
bining Two Offices—Mc-
Clellan Rather Favors It

After a lengthy caucus yesterday morning, when the board of supervisors went over the ordinances which will become operative with the transfer of the waterworks and sewer systems, and discussed generally how the departments are to be managed, an agreement was reached which calls for a special caucus this evening. At this time, in all probability, the superintendent of the systems will be decided upon.

This appointment is to be made by Mayor Fern, and it was tacitly understood that the appointment should be made this evening. And at the same time it is planned to agree formally or informally on the successor of L. M. Whitehouse, city and county engineer, whose resignation was called for a few days ago by a resolution of the board.

A plan was brought up and discussed for some time at the caucus yesterday which calls for the successor of Mr. Whitehouse to be superintendent of the water and sewer works also. This plan received considerable favorable support and it was given out after the meeting that there is some chance of its being adopted. It is pointed out in behalf of the scheme that the city and county would save about \$3000 a year by this consolidation of work and that other advantages, in addition to the financial one, would result from this plan. The \$3000 represents the proposed salary of the water and sewer works manager.

McClellan Favors It. Supervisor W. H. McClellan, chairman of the water and sewer committee, does not hesitate to say that he is very much in favor of this plan, and also of others designed to give an economical administration of the two departments. He wishes to dispose of the need of clerks for the collections of the water and sewer rates by pressing several clerks, now in the employ of the city and county, into that service. He says that by using all the available time of the clerks in the garbage and building inspector's departments, and also the clerks in the city and county treasurer's office, it will not be necessary to employ any new men for this work.

Under the present plan, the fees collected will be turned over to the city and county treasurer, who will act as an ex-officio treasurer of the departments.

The board has practically settled on the ordinances. Supervisor McClellan states that only a few slight and phraseological changes remain to be made.

The governor has stated that the formal transfer will probably not be made until after June 15. The delay, he states, is on account of the conveying instruments which are under way of preparation. Mr. McClellan held a conference with the governor last week, and was informed of the delay, the chief executive saying, however, that it would not interfere with the preparations for acquiring the new interests.

\$4500 Salary Suggested. A report has been prepared and presented to Mayor Fern on the plan to have the city and county engineer act as manager of the works also. It is suggested in this report that he be given \$4500 a year or \$375 a month, which is \$100 more a month than the present salary of the engineer. If this scheme is carried out, an assistant manager will be required, say the city fathers.

If this plan is adopted, it means that James Lynch will not be appointed manager of the works. He was informed of this by Supervisor McClellan. James T. Taylor, suggested as the successor of Mr. Whitehouse, is believed to be willing to accept the position of engineer with its new duties.

Speaking of the transfer, Supervisor McClellan said: "We are trying to give the people an economical administration of the departments. We will make a number of changes, with this idea in view, in the personnel of the departments. By making the city and county engineer manager of the works, a saving of about \$3000 a year is realized. And by eliminating persons on the clerical staff, we will also save considerable."

"The ordinances, which we went over yesterday, are satisfactory. This evening we will give them our final attention before introduction. If nothing unexpected happens."

The action of George E. Ward against the Inter-Island Steam Navigation Company for \$50,000 damages for personal injuries occupied Judge Robinson's division of the circuit court this morning. The trial has been in progress for some time.

LONG-DEMANDED IMPROVEMENTS NOW IN SIGHT

Governor Will Soon Forward
Statement Favoring Floating
of Territorial Bonds

EXACT AMOUNT IS
NOT YET DECIDED

Will Probably Not Reach Million
and a Half Now—Treasurer's
Statement Considered

A million or more dollars may be available soon for public improvements in the territory. President Wilson will be called upon soon to give his approval to the proposed new territorial bond issue which was authorized by the last legislature. Reports and the necessary documents on this bond project are being prepared by the attorney-general, and will come before Governor Pinkham within a few days, to be forwarded by him to President Wilson.

In addition to these facts, the chief executive made it known today that he will not set the bond issue definitely at \$1,500,000. He said it will be a figure considerably less, but he does not wish now to state the specific sum. Several harbor improvements, contemplated when the legislature agreed upon the amount of the issue, are now regarded by the governor as unnecessary under present conditions. The proposed Lahaina wharf is an instance in point.

He says the new territorial prison should be built at once.

Treasurer Conkling has prepared a lengthy statement giving facts and figures relative to the bond issue, and this statement or report, which favors the immediate flotation of the bonds, is before Governor Pinkham.

Speaking on the subject, the chief executive said this morning: "I have deferred this matter until I knew the amount of the present valuations. But now that I have this information we can go ahead. I do not propose to ask for \$1,500,000. I do not believe we require that large amount. We can very well omit making some of the improvements which, while desirable, are not imperative. The papers are now being prepared. I have gone over them and made a few changes, as the secretary of the Territory Thayer. After the next reading they will be probably ready to send on to Washington."

SECRETARY FOR Y. W. C. A. WILL COME IN AUGUST

Miss Carrie Chandler of New
York City to Take Miss
Erickson's Place

Miss Carrie Chandler of New York City, an association worker of wide and varied experience in the east and south, has been selected by the board of directors of the Honolulu Women's Christian Association as general secretary of the local organization. Miss Chandler will arrive in Honolulu about the middle of August, and will take the position left vacant by the recent resignation of Miss Esther Erickson, who severed her connection with the local work Saturday.

Mrs. Walter F. Frear, president of the board of directors, stated this morning that the board is eagerly looking forward to the arrival of Miss Chandler in order that the local work may retain its present high degree of efficiency. Miss Erickson will shortly leave for her home in the northwest, and after a visit there intends to take up association work in the east.

During the remainder of this month, the members of the board of directors will alternate in taking charge of the office in the Boston building, and Mrs. Philip Frear will assume charge of the lunch room. Beginning July 1, and continuing until the arrival of Miss Chandler, Miss Margaret C. Tupper, physical director, will act as general secretary.

RUSSIANS LEAVE HAWAII FOR SIBERIA

Russians to the number of 65, who have been drifting into the city from island plantations, will be sent back to Siberia with the departure of the Pacific Mail liner Persia at 7 o'clock tomorrow morning. The immigrants will be carried as far as Kobe, Japan; where they will be transhipped to a steamer that will bear them to Vladivostok.

Fifty Filipinos are numbered with the delegation of Asiatic steamer passengers that are to join the Persia at Honolulu.

Captain J. Hill reported a strong trade wind for the greater part of the voyage from San Francisco to Honolulu. The Persia was berthed at Pier No. 7 shortly before noon today and will remain until early tomorrow morning, while 500 tons of coal are placed in the bunkers. With the exception of 320 sacks of mail nothing was discharged from the Persia, this vessel being a foreign bottom and under coastwise regulations not permitted to carry freight between two American ports.

The smallest list of passengers ever leaving San Francisco in the Persia arrived—12 cabin, 7 second class and 183 Asiatic steamer travelers proceeding to the far east in this vessel.

Before leaving the coast the federal immigration authorities placed a score of more Chinese on board, who are expected to be dropped at Hong Kong.

APPOINTMENT RUMORS SPREAD BUT NOBODY FOUND TO BACK THEM

"Col. McCarthy, collector of customs; Porter Boyd, collector of internal revenue; J. J. Smydy, United States marshal." The rumor that these names had gone to the United States senate this morning as presidential appointments stirred political circles to the depths. Democratic circles particularly were stirred up. In half an hour the report went all over the city and the Star-Bulletin office telephones were ringing constantly. Anxious inquirers wishing to get the latest. But the origin of the rumor could not be traced and no news, so far as can be learned, has come from Washington of any appointments this morning. It looks like another exploded yarn.

Porter Boyd was U. S. vice-consul here, before the days of territorial government. He is now residing on the mainland somewhere.

Inquiry of federal officials failed to bring any authoritative confirmation of the story.

LUTTED REPORTS BIG MONEY FROM LAKEVIEW OIL

Local Stockholder Receives
Message Saying \$50,000
a Day Being Realized

(By Federal Wireles.)
SAN FRANCISCO, June 7.—One hundred ten thousand barrels equivalent fifty thousand dollars daily.

This personal message awaited a local stockholder when he came down town this morning. It refers to the output of the Lakeview No. 2 Oil Company, probably including that of its two previously yielding wells with the prodigious flow of the gusher brought in on May 10. In the Star-Bulletin of Saturday the latest mail news of the gusher was given, showing it with uncontrolled on May 25 and yielding between 40,000 and 50,000 barrels a day. Oil journals received by last mail stated that 90 per cent of the flow was being saved, and that it was 25 gravity—worth 55 cents a barrel in the market. The Standard Oil people had made a cut in price, which took 5 cents a barrel off.

Mr. Lutted was the sole promoter of Lakeview No. 2 in Hawaii, and advertised it heavily in the local papers two years ago. A considerable amount of the stock was sold throughout the islands at 60 cents a share, some of which was resold at a discount by holders losing faith in the enterprise as time passed without results other than occasional encouraging reports. Mr. Lutted indeed came in for some derision regarding his promotion, the stock having been classed as wildcat by a weekly paper advocating a blue sky law for Hawaii. He is now entitled, say the stockholders, to congratulation upon the fulfillment of his rosy promises of the company's success. Many of the purchasers have held on to their stock, paying two assessments, for one of these receiving a stock bonus.

Last year the company abandoned temporarily two wells sunk to a great depth in another section from that in which the gusher has been struck, after sealing up the holes to shut off a tremendous gas pressure. The intention was to resume operations when funds became available, the directors meantime looking around for another location. They then found in the bankrupt Pentland property, section 4, 11-23, Maricopa flats. Within 48 hours the engineer recovered the jammed drilling tools in one well here, and this and another partly finished well taken over were shortly afterward brought in as producers. From the process of these wells the company paid off the Pentland debt early this year and met the expense of bringing in No. 1 well, the present phenomenal gusher.

The majority of the stock is owned by Michigan capitalists, but enough is held in Hawaii to bring a few thousand dollars into circulation here.

HUERTA YIELDS, SUSPENDS BLOCKADE OF TAMPICO AND WASHINGTON IS GRATIFIED

Dictator Evidently Listens to Advisers Who Point Out Firm Attitude of U. S.—Washington Hears With Much Satisfaction—Believes He Will Accept Results of Mediation

[Associated Press service by Federal Wireles.]
MEXICO CITY, Mex., June 8.—The threatened crisis between the United States and Mexico, caused by the preparations of President Huerta to blockade Tampico, has been averted as suddenly as it arose.

President Huerta issued orders through the navy office today suspending the blockade, which he had previously decided upon in order to check the landing of munitions of war by the constitutionalists. The two gunboats ordered from Puerto Mexico have been now told to return and Huerta has plainly yielded to the insistence of his advisers on this point.

Wilson is Much Pleased

[Associated Press service by Federal Wireles.]
WASHINGTON, D. C., June 8.—The government heard with obvious satisfaction the news from Mexico City that Huerta will not try to blockade Tampico. Washington accepts Huerta's decision as conclusive proof that he holds a sincere determination to accept the results of mediation. The developments are regarded as extremely important.

Women Starve at Mazatlan

[Associated Press service by Federal Wireles.]
MAZATLAN, Mex., June 8.—The horrors of a siege in wartime were emphasized here today when 200 starving women followed the carriage of the federal governor, beseeching him pitifully to surrender the city to the rebels. The scenes were heart-rending.

Suffragettes Now Plan to Heckle the King and Queen

[Associated Press service by Federal Wireles.]
LONDON, England, June 8.—"No peace for the king or queen!" is the latest suffragette order.

Young women today screamed denunciations against forcible feeding, when their majesties entered the royal box at the International Horse Show. The offending suffragettes were removed only after a fierce struggle, during which they hurled all sorts of epithets in the direction of royalty. The scene created an uproar.

4,000 Ton Steamer Goes Through Gatun Locks Easily

[Associated Press service by Federal Wireles.]
PANAMA, Canal Zone, June 8.—The steamer Alliance, 4000 tons, passed through the Gatun locks today in 40 minutes. This is held to be a very good record and proof of the ease of operating the great structures.

First Big Polo Game Postponed

NEW YORK, N. Y., June 8.—The first international polo game between the American trophy-holders and the British team of challengers has been postponed until next Saturday because of the injury to Capt. Chagge, one of the star players for the visitors. He suffered a broken nose in practice yesterday, but it is believed that he will be able to take part in the contest by next Saturday.

Roosevelt Arrives in Madrid

[Associated Press service by Federal Wireles.]
MADRID, Spain, June 8.—Col. Roosevelt arrived here today to be present at the wedding of his son Kermit to Miss Belle Willard, daughter of Joseph E. Willard, U. S. ambassador to Spain. Kermit Roosevelt arrived May 22. The wedding is to take place this week.

BARRACKS AND QUARTERS FOR TWO BATTALIONS AT SHAFTER ARE NEXT

Buildings to House Four Companies Each Between Present Post and Car Line

Fort Shafter is the next Oahu army post slated for extensive improvement, and as soon as the sundry civil bill now before Congress becomes law, work on barracks and quarters for two more battalions will be started. It is understood that this will be a "rush order," and that as soon as possible the permanent post for the entire regiment will be available.

It is now recommended that two huge barracks, to house a war strength battalion of 600 men each, be built on the mauka side of the main road, in the hollow some 200 yards Walkiki of the present quartermaster storehouse. Officers' quarters will be constructed in the rear of the main line now stretching from the entrance to post headquarters. There is plenty of room for the new sets, and the location is all that can be desired.

Colonel F. H. French, post commander, and Lieutenant-colonel B. Frank Cheatham, department quartermaster, have looked carefully over the ground, and while no report has been made public yet, it is understood that they favor the above-mentioned sites for barracks and quarters.

Department authorities are at a loss to explain the long delay in the passage of the sundry civil bill, for it was generally understood that it would become a law early in the spring, and under this understanding a special request was made that the money for Oahu be made available immediately on the passage of the bill. However, it is now so close to the new fiscal year that this provision would have little bearing on the commencement of work.

Moving Day at Schofield. Two squadrons of the 4th Cavalry are now located in barracks and quarters in the new post at Castner, adjacent to the 1st Infantry, and the Lathrop post is now more spread-out than ever. The 3rd squadron moved down Saturday, and the 2nd yesterday. Headquarters and the 1st squadron will remain at the old cantonment for the present. The sundry civil bill now before Congress provides money to complete the regimental post at Castner, and as soon as this becomes available work on barracks and quarters for the other squadron will be started, and in the opinion of the quartermaster authorities will be ready for occupancy within a year.

The 1st battalion, 1st Field Artillery, which has been under canvas since arriving from the Philippines nearly a year ago, will strike its camp at once, and move into the old Cavalry cantonment. In the near future field company E, Signal Corps, will be transferred from Fort Shafter to the Cavalry cantonment at Schofield, so that with a full regiment of Field Artillery, a squadron of cavalry, and a signal outfit, the upper half of the brigade post will be very much mounted service. Doughboys and concrete soldiers beware of the horse!

DEMOCRATS AND G. O. P. TO FIGHT ON MAUI

While there will be at least five parties represented on the primary ballot, on Maui the fight will be mainly between the Republicans and Democrats, with the Home Rule, Progressive, Lahui and Socialist, taking but a few votes. This is how it appears to the wisecracks on the island, says the Maui News.

Candidates for the several county offices have not come out with the definite statement on their candidacy. The political camps just now are watching with interest the outcome of the plebiscite, which will decide the bond issue project. After the plebiscite the candidates are expected to rush into the field.
